Run script at system startup + Mouse scrolling TUTORIAL

There is often a need for running some commands at system startup. There is more, than single path to achieve this task, this is an example. Moreover some basic mouse scrolling functionality is provided this way.

1) install imwheel package:

#sudo aptitude install -y imwheel

2) scroll by 5 lines:

#vim ~/.imwheelrc

„.*"
None, Up, Button4, 5
None, Down, Button5, 5
Control_L, Up, Control_L|Button4
Control_L,Down, Control_L|Button5
Shift_L, Up, Shift_L|Button4
Shift_L, Down, Shift_L|Button5

3) <u>enable earch login run of „.script.sh"</u>

#vim ~/.profile

~/.script.sh

#vim ~/.script.sh

#!/bin/bash
imwheel &>> /dev/null
exit 0

#sudo chmod +x ~/.script.sh
